SUMMARY

Software Engineer with 2+ years shipping production fintech and cryptocurrency-exchange software (Ruby on Rails, React/Next.js, REST APIs) used by 1,000+ daily active users. Experience spans trading/payment workflows, blockchain integrations, and the full lifecycle — design, implementation, testing, deployment, and operations on AWS with Docker/Kubernetes/CI/CD. Uses generative AI tools (Cursor) to draft code, then evaluates and hardens output before it ships.

SKILLS

Languages: Ruby, Python, JavaScript/TypeScript, SQL

Payments / fintech: REST APIs, trading systems, blockchain integrations, Stripe (personal project), production support mindset

Systems: Distributed services, Docker, Kubernetes, AWS, Linux, CI/CD, Git, code reviews

Quality: Unit testing (Jest), data structures & algorithms, GenAI-assisted development with human review

Web: React.js, Next.js, Node.js/Express, Ruby on Rails, MongoDB

EXPERIENCE

Software Engineer — SkyAch Software Solutions Pvt. Ltd.

Fintech / cryptocurrency exchange platforms

Jun 2024 – Aug 2026

- Designed, developed, tested, and shipped fullstack payment-adjacent exchange features (Rails + React/Next.js) serving 1,000+ daily active users.
- Built REST APIs and blockchain/trading integrations so funds movement and order flow stayed consistent in production.
- Wrote logical, maintainable code and participated in reviews; investigated production issues and pushed reliability fixes.
- Deployed and operated services on AWS using Docker, Kubernetes, and CI/CD; comfortable with Linux-based production environments.
- Used generative AI (Cursor) to accelerate implementation, then refined outputs against correctness, security, and testability standards before merge.

PROJECTS

Ticketing marketplace with Stripe payments (personal) — Node.js, TypeScript, Kubernetes

- Built a payments service that charges orders via Stripe, publishes events on NATS, and coordinates with auth/tickets/orders — design through deploy with Jest tests and Docker/Kubernetes.

EDUCATION

B.Tech, Computer Science and Engineering (AI specialization)

ITM SLS Baroda University / ITM Group of Institutions, Vadodara

2020 – 2024

- Coursework and projects in data structures, algorithms, OOP, machine learning, and computer vision.
