SUMMARY

Software Engineer with 2+ years of professional experience building customer-facing web platforms and backend APIs. Comfortable starting from broadly defined problems, delivering in agile cycles, and operating services in Docker/Kubernetes on AWS. Built a personal distributed marketplace (microservices + event bus) to deepen skills in scalable, fault-tolerant design. B.Tech CSE.

SKILLS

Languages: Ruby, Python, JavaScript/TypeScript, SQL

Backend / data: Ruby on Rails, Node.js/Express, REST APIs, MongoDB, JWT, NATS eventing

Frontend: React.js, Next.js

Infrastructure: AWS, Docker, Kubernetes, CI/CD, Linux, Git, Skaffold

CS fundamentals: Data structures, algorithms, OOP, complexity analysis, unit testing

EXPERIENCE

Software Engineer — SkyAch Software Solutions Pvt. Ltd.

Product engineering — fintech / crypto exchange

Jun 2024 – Aug 2026

- Conceived and shipped new product features from ambiguous requirements using Rails, React.js, and Next.js for 1,000+ daily active users.
- Designed REST APIs and integrations (including blockchain/trading paths) in a production environment where reliability matters.
- Worked across the lifecycle in an agile team: implementation, testing, code review, and cloud deployment (Docker, Kubernetes, CI/CD, AWS).
- Used AI coding assistants to prototype faster, then independently verified correctness before release.

PROJECTS

Ticketing marketplace (personal) — distributed systems practice

- Built auth, tickets, orders, payments, and expiration services in TypeScript; services communicate over NATS for eventual consistency.
- Focused on scalable, fault-tolerant patterns: isolated datastores (MongoDB), JWT sessions, Stripe payments, Kubernetes deploy, Jest tests.

ML prediction projects (personal) — Python

- Predicted customer churn and daily bike-rental demand from tabular features (seasonal/environmental signals).

EDUCATION

B.Tech, Computer Science and Engineering (AI specialization)

ITM SLS Baroda University / ITM Group of Institutions, Vadodara

2020 – 2024
