SUMMARY

Software Engineer with 2+ years delivering custom web applications end to end. Professional experience in React.js/Next.js frontends and REST backends; additional hands-on Node.js/Express, MongoDB, and Git workflows from production-style microservices. Strong documentation, code-review, and client-ready communication habits. B.Tech Computer Science (full-time, 4-year degree).

SKILLS

Must-have alignment: Node.js, REST API design, MongoDB, JavaScript, Git, HTML/CSS, React.js

Also used in production: Ruby on Rails, Next.js, Docker, Kubernetes, AWS, CI/CD

Practices: Agile delivery, code reviews, API documentation, unit tests (Jest)

EXPERIENCE

Software Engineer — SkyAch Software Solutions Pvt. Ltd.

Custom product engineering for fintech / exchange clients

Jun 2024 – Aug 2026

- Designed, coded, and enhanced application components across Rails backends and React/Next.js UIs for 1,000+ daily users.
- Delivered RESTful APIs and integrations (including blockchain/trading) and documented behavior for teammates.
- Took part in team discussions, code reviews, and production troubleshooting; implemented fixes independently when needed.
- Maintained Git-based workflows and CI/CD so changes were reviewable and releasable.

PROJECTS

Node.js microservices + Next.js client (personal)

- Built Express/TypeScript services (auth, tickets, orders, payments) with MongoDB, JWT cookie sessions, and REST endpoints.
- Implemented a Next.js/React client and Jest API tests; used Git throughout and Docker/Kubernetes for local deploy.

React practice & ML utilities (personal)

- Additional React practice repo plus Python ML projects (churn scoring, bike-rental demand).
