Hiring Team

Optum / UnitedHealth Group

Re: Software Engineer — Java, Python, SQL, AI, ML (req 2377743), Bengaluru

Dear Optum Hiring Team,

I am applying for Software Engineer, requisition 2377743. The posting asks for 1+ years of software development plus Python and/or Java, REST APIs, SQL, Git, and CI/CD. I have 2 years 2 months of production Python FastAPI REST APIs and microservices, SQL on MySQL/PostgreSQL/Snowflake, GitHub Actions CI/CD, Git, Docker, and Kubernetes.

Core Java, Azure DevOps, and ML frameworks (TensorFlow, PyTorch, LangChain) are ramps — I am not claiming them as production. I already use Cursor for AI-assisted development and hold a B.Tech with an AI specialization. I will relocate to Bengaluru.

Sincerely,

Atul Banyal
