Hiring Team

Canonical

Re: Software Engineer — Python and K8s, job 3752633 (home-based worldwide)

Dear Canonical Hiring Team,

I am applying for Software Engineer — Python and K8s (3752633). The posting is home-based worldwide and does not set a 3+ year floor. I have 2 years 2 months of production Python, Docker, Kubernetes, GitHub Actions CI/CD, and AWS on products used by 1,000+ daily users. I can work remotely from India and travel twice a year for team sprints.

Linux package management (Debian/Ubuntu), kernel/networking/storage depth, and owning open-source monitoring/alerting are ramps. I am not claiming Canonical IS operations experience. B.Tech CSE (AI), CGPA 7.7, 2020–2024. One employer since graduation: Skyach Software Solutions.

Sincerely,

Atul Banyal
