

Atul Banyal

Software Engineer

Mohali, Punjab, India | +91 63518 06327 | atulbanyalreal@gmail.com

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience and a B.Tech specialization in Artificial Intelligence, building full-stack platforms with Ruby on Rails and Python (FastAPI), alongside Vue.js, React.js, and Next.js. Delivers production APIs and UI workflows for fintech/cryptocurrency and tree care products. Also builds OLTP-to-OLAP data pipelines, replicating MySQL into Snowflake via log-based CDC to serve analytics and BI workloads off the production path. Uses Cursor and AI-assisted development to ship faster, with Docker, Kubernetes, CI/CD, and AWS supporting 1,000+ daily active users.

TECHNICAL SKILLS

Languages: Ruby, Python, JavaScript, Shell Script

Backend: Ruby on Rails, FastAPI, RESTful APIs, microservices, Sidekiq

Frontend: Vue.js, React.js, Next.js

AI & Development: Cursor, AI-assisted coding workflows, Artificial Intelligence (academic specialization)

Blockchain & APIs: Ethereum, Bitcoin, Solana, TRON, Web3 APIs; Binance, Kraken, CoinMarketCap

Data & Analytics: Snowflake (OLAP), Airbyte (log-based CDC), dbt, ETL/ELT pipelines, OLTP/OLAP architecture

DevOps & Databases: Docker, Kubernetes, GitHub Actions (CI/CD), Git, AWS; MySQL, PostgreSQL, Redis, Snowflake

Tools: Openware Stack (Peatio, Barong, Finex), Postman, Apidog

PROFESSIONAL EXPERIENCE

Software Developer

June 2024 – August 2026

Skyach Software Solutions Pvt. Ltd. | Mohali, India

- Developed and maintained production Ruby on Rails applications serving 1,000+ daily active users on a live cryptocurrency exchange.
- Built Rails REST APIs and wallet/trading modules with PostgreSQL; integrated Ethereum and Bitcoin for deposits, withdrawals, and on-chain processing.
- Connected Binance and Kraken APIs for market data and liquidity; shipped GitHub Actions CI/CD with Docker images to Kubernetes.
- Designed and built Python FastAPI backend services for a tree care platform used by companies that buy, sell, and cut trees, covering listings, orders, and service operations.
- Implemented FastAPI REST endpoints with MySQL models and request/response validation for multi-company product and service workflows.
- Developed Vue.js frontend features integrated with FastAPI APIs for company dashboards, order flows, and tree service management.
- Defined API contracts and backend business logic connecting Vue.js clients to FastAPI services for end-to-end tree care operations.

KEY PROJECTS

Crypto Exchange Platform

Ruby on Rails, Openware Stack, Docker, Kubernetes

- Built a multi-blockchain cryptocurrency exchange on Openware Stack supporting 1,000+ daily active users with secure onboarding and accounts.
- Engineered real-time order matching and trading flows, and integrated 2+ external exchange APIs for liquidity across trading pairs.

Tree Care Platform

Python, FastAPI, Vue.js, MySQL

- Architected FastAPI backend services for multi-company tree buy/sell/cut workflows, including listings, orders, and service operations.
- Modeled MySQL schemas and FastAPI endpoints with typed request/response handling for reliable REST APIs.
- Built Vue.js interfaces for company users and wired them to FastAPI for end-to-end tree product and service management.

Tree Care Analytics Pipeline

Python, FastAPI, MySQL, Airbyte CDC, Snowflake, dbt

- Built a dual-store platform separating transactional and analytical workloads: FastAPI serving order and listing writes against MySQL (OLTP), replicated by log-based CDC into Snowflake (OLAP) for BI dashboards.
- Configured MySQL binlog replication (ROW format, GTIDs) and Airbyte CDC to stream changes into Snowflake without adding query load to the production database.
- Modeled staging and mart layers in dbt, serving pre-aggregated results to API endpoints instead of scanning five years of orders per request.

EDUCATION

Bachelor of Technology in Computer Science and Engineering, Specialization in Artificial Intelligence

ITM SLS Baroda University | Vadodara, Gujarat | CGPA: 7.7 | 2020 – 2024
