PROFESSIONAL EXPERIENCE

Software Developer — Skyach Software Solutions Pvt. Ltd.

Mohali, India

June 2024 – August 2026

- Built production Python FastAPI REST APIs (listings, orders, services) with MySQL OLTP and Vue.js UI for a tree care platform.
- Replicated operational MySQL into Snowflake with Airbyte CDC and modeled dbt marts so reporting stayed off the transaction path — ETL/ELT, not a notebook demo.
- Deployed services with GitHub Actions, Docker, and Kubernetes on AWS-adjacent hosting for a live cryptocurrency exchange (1,000+ DAU).
- Integrated exchange and wallet APIs (Binance, Kraken, Ethereum/Bitcoin) with validation and failure handling.
- Led a construction management Rails product (five modules: tracking, contracts, payments, workforce, vendors).
- Uses Cursor for AI-assisted coding; B.Tech with an AI specialization. Did not ship Kubeflow/MLFlow pipelines in production.

KEY PROJECTS

Tree Care Platform — Python, FastAPI, Airbyte CDC, Snowflake, dbt

- Closest match to Canonical's data/workflows bar: Python APIs plus CDC → warehouse → dbt marts.

Crypto Exchange — Docker, Kubernetes, GitHub Actions, AWS

- Container and Kubernetes delivery of production workloads at 1,000+ DAU.

Construction Management — Ruby on Rails, PostgreSQL

- Workflow APIs for contracts, payments, and vendors.
