PROFESSIONAL EXPERIENCE

Software Developer — Skyach Software Solutions Pvt. Ltd.

Mohali, India

June 2024 – August 2026

- Built production Python FastAPI REST APIs for a tree care platform (listings, orders, services), with MySQL models, request validation, and Vue.js UI integration.
- Integrated external APIs (Binance, Kraken, Ethereum/Bitcoin wallet flows) on a live cryptocurrency exchange serving 1,000+ daily users.
- Deployed and monitored services with GitHub Actions CI/CD, Docker, Kubernetes, and AWS — the same cloud-adjacent path Anteriad lists for AI apps.
- Replicated operational MySQL into Snowflake with Airbyte CDC and dbt marts so reporting stayed off the OLTP path.
- Led a construction management Rails product (five modules: tracking, contracts, payments, workforce, vendors) in Agile delivery.
- Used Cursor to research and apply new libraries faster; did not train or ship LangChain/RAG pipelines in production.
