

Atul Banyal

Software Engineer | Python · Docker · Kubernetes · AWS · CI/CD

Mohali, Punjab, India · Open to remote India / Bengaluru

+91 63518 06327 · atulbanyalreal@gmail.com · linkedin.com/in/atul-banyal-6629a2185

PROFESSIONAL SUMMARY

Software Engineer with 2 years 2 months of production Python, Docker, Kubernetes, GitHub Actions CI/CD, and AWS. Ships REST APIs and container deploys used by 1,000+ daily users, then follows failures from CI to runtime. Applying for Canonical's home-based Software Engineer — Python and K8s (3752633). Debian/Ubuntu package administration and kernel-level Linux work are ramps — not claimed as production.

TECHNICAL SKILLS

Must-have alignment: Python, Docker, Kubernetes, public cloud (AWS), Linux, Git, CI/CD, REST APIs

Backend: FastAPI, Ruby on Rails, RESTful APIs, microservices, Sidekiq

Languages: Python, Ruby, JavaScript, TypeScript, Shell Script

Data: MySQL, PostgreSQL, Redis, Snowflake, Airbyte CDC, dbt, SQL

Ramps: Linux systems administration and package management (Debian/Ubuntu), kernel/networking/storage depth, Prometheus/Grafana-style alerting ownership

PROFESSIONAL EXPERIENCE

Software Developer — Skyach Software Solutions Pvt. Ltd.

Mohali, India

June 2024 – August 2026

- Wrote production Python (FastAPI) for a tree care platform: REST APIs, MySQL models, request validation, and Vue.js UI integration.
- Shipped GitHub Actions CI/CD that built Docker images and rolled them to Kubernetes for a live cryptocurrency exchange (1,000+ DAU) on AWS-adjacent hosting.
- Debugged deploy and runtime failures on containerized services (failed pipelines, API errors, SQL) rather than handing off after merge.
- Integrated third-party APIs (Binance, Kraken, Ethereum/Bitcoin wallet flows) with attention to correctness and failure modes.
- Led a construction management Rails product (five modules: tracking, contracts, payments, workforce, vendors) in a distributed Git-review team.
- Used Shell Script and Git daily; comfortable with async written updates and twice-yearly travel for team events.

KEY PROJECTS

Crypto Exchange — Rails, Docker, Kubernetes, GitHub Actions, AWS

- Closest match to Canonical's Python/K8s operations bar: containers, CI, production follow-up at 1,000+ DAU.

Tree Care Platform — Python, FastAPI, SQL, Vue.js

- Production Python APIs on Linux-hosted services; OLTP data replicated to Snowflake with Airbyte CDC and dbt.

Construction Management — Ruby on Rails, PostgreSQL

- Multi-module product APIs with Git reviews and Agile delivery.

EDUCATION

B.Tech, Computer Science and Engineering (AI specialization)

ITM SLS Baroda University, Vadodara, Gujarat · CGPA 7.7

2020 – 2024
