SUMMARY

Software Engineer with 2+ years of professional experience in application development, testing, and operational delivery of fintech systems. Primary production stack is Ruby on Rails and React/Next.js; strong Python from CS/AI coursework and ML projects. Hands-on with system design of multi-service applications, Agile SDLC, CI/CD, and cloud operations. Interested in financial services engineering; prior banking-firm experience is not required per the posting.

SKILLS

Programming: Python, Ruby, JavaScript/TypeScript, SQL

Engineering: REST APIs, system design, unit testing, Git, Agile SDLC, Linux

Cloud: AWS, Docker, Kubernetes, CI/CD

Domain: Fintech / crypto-exchange platforms, payments flows, secure APIs

Frontend: React.js, Next.js

EXPERIENCE

Software Engineer — SkyAch Software Solutions Pvt. Ltd.

Fintech product engineering

Jun 2024 – Aug 2026

- Delivered features across the software lifecycle — design, coding, testing, and release — on exchange platforms used by 1,000+ daily active users.
- Implemented backend APIs and trading/blockchain integrations with attention to correctness and operational stability.
- Practiced Agile collaboration: standups, reviews, and incremental delivery; used CI/CD and Kubernetes on AWS.
- Debugged production issues and improved reliability rather than treating deploy as the end of ownership.

PROJECTS

Event-driven marketplace (personal) — system design

- Designed services for auth, inventory, orders, payments, and expiration with an event bus, isolated data stores, and Stripe settlement.
- Added automated tests and Kubernetes manifests to keep the system operable locally.

Python ML — churn and demand models

- Built Python models for customer-churn scoring and bike-rental demand using tabular seasonal/environmental features.
