

Atul Banyal

Software Engineer

Mohali, Punjab, India | +91 63518 06327 | atulbanyalreal@gmail.com

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience and a B.Tech specialization in Artificial Intelligence. Builds fullstack products across fintech, industrial analytics, and operations platforms using Ruby on Rails, Python (FastAPI), Vue.js, React.js, and Next.js. Comfortable owning features end to end — APIs, frontend integration, blockchain/payment flows, and cloud DevOps (Docker, Kubernetes, CI/CD, AWS). Uses Cursor and AI-assisted workflows to ship reliable production software faster.

TECHNICAL SKILLS

Languages	Ruby, Python, JavaScript, Shell Script
Backend	Ruby on Rails, FastAPI, RESTful APIs, Sidekiq, Microservices
Frontend	Vue.js, React.js, Next.js
AI & Tools	Cursor, AI-assisted coding workflows, Artificial Intelligence (academic specialization)
Blockchain & APIs	Ethereum, Bitcoin, Solana, TRON, Web3 APIs; Binance, Kraken, CoinMarketCap
DevOps & Data	Docker, Kubernetes, GitHub Actions (CI/CD), Git, AWS; PostgreSQL, MySQL, Redis
Other	Openware Stack (Peatio, Barong, Finex), Postman, Apidog

PROFESSIONAL EXPERIENCE

Software Developer

June 2024 – Present

Skyach Software Solutions Pvt. Ltd. | Mohali, India

- Developed and maintained production Ruby on Rails applications serving 1,000+ daily active users on a live cryptocurrency exchange platform.
- Built RESTful APIs and microservices using Rails to support high-volume trading, account, and wallet operations for 1,000+ users.
- Integrated 2 blockchain networks (Ethereum, Bitcoin) for deposits, withdrawals, and on-chain transaction processing.
- Designed secure wallet management and transaction modules with Rails and PostgreSQL, ensuring reliability and auditability for financial operations.
- Connected 2 third-party exchange APIs (Binance, Kraken) for real-time market data and liquidity aggregation.
- Built GitHub Actions CI/CD pipelines that build Docker images on every push and deploy them to staging/production Kubernetes clusters for zero-touch rollouts.
- Led development of a construction management platform in Ruby on Rails, delivering 5 core modules for project tracking, contracts, payments, workforce, and vendor management.
- Built backend APIs with Python FastAPI and Vue.js frontend features for the Mantex industrial analytics platform, supporting biomass measurement workflows, data visualization, and system integrations.

KEY PROJECTS

Mantex — Biomass Analytics Platform

Technologies: Python, FastAPI, Vue.js, PostgreSQL, REST APIs

- Developed FastAPI backend services for Mantex, an industrial platform that analyzes biomass and wood-based raw materials (moisture, ash content, and energy value) for bioenergy and pulp industries.
- Built Vue.js interfaces to visualize measurement results, support operator workflows, and present analysis data in a clear, usable UI.
- Implemented REST APIs for measurement data handling and integrations so analysis results could connect with downstream business systems and workflows.

- Worked across backend and frontend to deliver reliable end-to-end features for industrial users who depend on fast, accurate material analysis.

Crypto Exchange Platform

Technologies: Ruby on Rails, Openware Stack, Docker, Kubernetes

- Architected a multi-blockchain cryptocurrency exchange using Openware Stack, supporting 1,000+ daily active users with secure onboarding and account management.
- Engineered a real-time order matching and trading engine optimized for production-level transaction throughput.
- Expanded liquidity by integrating 2+ external exchange APIs across multiple trading pairs.

Construction Management Platform

Technologies: Ruby on Rails

- Designed and shipped end-to-end Rails workflows for builders and service providers, automating contracts, payments, workforce scheduling, and vendor coordination.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Specialization in Artificial Intelligence

ITM SLS Baroda University | Vadodara, Gujarat

2020 – 2024

CGPA: 7.7
