Re: Software Engr I — Hyderabad (job 157479)

Dear Honeywell Hiring Team,

I am applying for Software Engr I in Hyderabad (job 157479). The posting prefers around 1 year shipping full-stack work on a React client and a Node.js/TypeScript Express backend. I have 2 years 2 months of professional React.js/Next.js plus a personal Express/TypeScript stack with MongoDB, REST, Jest, and Docker — the same shape as the essential competencies.

AngularJS, GraphQL/Apollo, and Redis are ramps for me. I can relocate to Hyderabad. B.Tech Computer Science, 2024.

Sincerely,

Atul Banyal
