

Atul Banyal

Software Development Engineer I | Payments platforms · Distributed services · AWS

Vadodara, Gujarat · Open to Bengaluru

atulbanyalreal@gmail.com · linkedin.com/in/atul-banyal-6629a2185

SUMMARY

2+ years professional software development on fintech/payment-adjacent platforms (Rails, React/Next.js, REST). Comfortable designing multi-tier services, testing major features, and joining on-call style production support. Uses GenAI tools with human review. B.Tech Computer Science.

SKILLS MATCHED TO FINOPS / PAYMENTS SDE I

Languages: Ruby, Python, JavaScript/TypeScript, SQL

Payments / finance systems: Order capture, Stripe settlement (personal), trading/wallet APIs, production support

Distributed: Multi-service apps, event-driven updates, AWS, Docker, Kubernetes, Linux, CI/CD

Quality: Jest tests, code review, GenAI-assisted coding with validation

EXPERIENCE

Software Engineer — SkyAch Software Solutions Pvt. Ltd.

Fintech / exchange platforms

Jun 2024 – Aug 2026

- Designed, coded, and tested payment-adjacent features (orders, balances, trading APIs) used by 1,000+ daily users — independently for well-scoped work, jointly for cross-service changes.
- Estimated and rolled out incremental launches: ship a slice, watch production, then the next slice.
- Debugged live issues on money-movement paths and pushed reliability fixes (the posting's on-call / payment-platform support analog).
- Operated services on AWS with Docker/Kubernetes/CI/CD in a Linux environment.
- Used generative AI to draft implementations, then hardened them before merge.

SELECTED WORK (PERSONAL)

Payments platform for a marketplace — Stripe, events, Kubernetes

- Implemented a payments service that charges an order, emits payment-created, and lets the orders service complete only after settlement — multi-tier, test-covered, deployed with the rest of the stack.

EDUCATION

B.Tech, Computer Science and Engineering (AI specialization)

ITM SLS Baroda University, Vadodara

2020 – 2024
