Hiring Team

Groww

Re: Software Development Engineer I — Bengaluru-VTP (GRID-17409)

Dear Groww Hiring Team,

I am applying for Software Development Engineer I at Groww. I have spent two years building customer-facing fintech: exchange and trading features in Ruby on Rails and React/Next.js for 1,000+ daily users. The work is ownership-heavy and intolerant of “almost correct” money movement — the same bar as a consumer investing product.

A personal project models a simple buy flow (hold inventory, charge, expire if unpaid) with Stripe and events, so orders complete only after money clears. I want to apply that product instinct to Groww’s multi-product platform in Bengaluru.

I can relocate to Bengaluru-VTP and would welcome the chance to own customer-facing investing features end to end.

Sincerely,

Atul Banyal
