Hiring Team

IBM Software / Confluent

Re: Software Engineer — Confluent, job 126243

Dear IBM Hiring Team,

I am applying for Software Engineer — Confluent (126243). The posting asks for 1–2 years of hands-on development (new grads welcome) and lists Years of Experience 1–4. I have 2 years 2 months shipping production features with tests, code review, and log-based debugging, plus a personal multi-service stack on Kubernetes.

I do not have production Java or Go. My languages are Ruby, JavaScript/TypeScript, and Node.js. I have not operated Kafka; personal work uses NATS events. I am applying because the role is scoped work with mentorship, and I want to build that distributed-systems depth at IBM India.

Sincerely,

Atul Banyal
