Hiring Team

JumpCloud

Re: Full Stack Software Engineer, Front-End Focus — India (Remote, Bangalore)

Dear JumpCloud Hiring Team,

I am applying for Full Stack Software Engineer, Front-End Focus (India, remote). I have 2+ years shipping React.js/Next.js UIs and REST APIs for a fintech product used by 1,000+ daily users, plus Node.js/Express on a personal multi-service stack. That is the 80/20 frontend/backend split in the posting — I am not claiming production Vue 3 yet; I will ramp on Vue/Pinia from a strong component-UI and TypeScript base.

The stack around the UI already matches: JavaScript/TypeScript, REST, MongoDB, Docker, Kubernetes, AWS, CI/CD, and Cursor as a daily tool with human review. I can work remotely in India, in English, and take on-call shifts.

Sincerely,

Atul Banyal
