- Built fullstack features in Python FastAPI + Vue.js (tree care listings/orders/services) and React.js/Next.js-capable UI work; REST APIs and SQL models.
- Stored, retrieved, and manipulated operational data (MySQL/PostgreSQL); replicated OLTP into Snowflake with Airbyte CDC and dbt for reporting off the transaction path.
- Diagnosed production issues on containerized services (failed deploys, API errors, SQL) and restored service with Git-based fixes.
- Worked with senior engineers on architecture choices for wallets, market-data APIs (Binance/Kraken), and five-module construction Rails workflows.
