SUMMARY

Software Engineer with 2 years 2 months of full-stack delivery: React.js/Next.js, JavaScript, HTML/CSS, REST APIs, MongoDB, Git, and AWS. Additional Python from personal ML utilities (not FastAPI/Django production). Comfortable with Docker/Kubernetes and CI/CD. B.Tech CSE.

SKILLS

Must-have alignment: JavaScript, HTML/CSS, React.js, REST APIs, MongoDB, Git, AWS

Python: personal ML scripts (churn scoring, demand models) — FastAPI/Django/Flask is a ramp

Good-to-have: Docker, Kubernetes, CI/CD, Jest, Agile delivery

EXPERIENCE

Software Engineer — SkyAch Software Solutions Pvt. Ltd.

Full-stack product engineering for fintech / exchange clients

Jun 2024 – Aug 2026

- Built React.js/Next.js UIs and REST backends for 1,000+ daily users; integrated payments/trading APIs with clear error handling.
- Used Git, code reviews, and AWS/Docker/Kubernetes so features reached production instead of stopping at local demo.
- Worked in Agile-style sprints: independent delivery, documentation, and production troubleshooting.

PROJECTS

Node.js microservices + Next.js client (personal)

- Express/TypeScript REST services with MongoDB, JWT sessions, Jest tests, Docker/Kubernetes.

Python ML utilities (personal)

- Churn scoring and bike-rental demand models in Python — shows Python fluency, not FastAPI production.

EDUCATION

B.Tech, Computer Science and Engineering (AI specialization)

ITM SLS Baroda University, Vadodara — BE/B.Tech equivalent

2020 – 2024
