SUMMARY

Software Engineer with 2 years 2 months shipping production web services and containerized deploys. Hands-on Docker, Kubernetes, Git, CI/CD, and AWS from product work plus a personal microservices stack. JavaScript/TypeScript for automation-adjacent app code. B.Tech CSE.

SKILLS

Posted alignment: Docker, Kubernetes, Git, CI/CD, AWS, JavaScript/TypeScript, Linux CLI, HTTP troubleshooting

Application delivery: React.js/Next.js, Node.js/Express, Ruby on Rails, REST APIs, MongoDB, Jest

Ramps (not claimed as production): Terraform, Ansible, Grafana/Prometheus/ELK, Windows server admin

EXPERIENCE

Software Engineer — SkyAch Software Solutions Pvt. Ltd.

Product engineering — deploys, reliability, and production fixes

Jun 2024 – Aug 2026

- Shipped and maintained a live web product (1,000+ DAU): REST APIs, React/Next.js UI, Git reviews, and release-ready changes.
- Used Docker and Kubernetes-oriented workflows plus AWS so services could be built, run, and rolled forward with CI/CD.
- Troubleshot production issues from logs and HTTP behavior; collaborated with teammates on root-cause fixes.
- Documented API and deploy steps so other engineers could reproduce environments.

PROJECTS

Node.js microservices on Kubernetes (personal)

- Containerized Express/TypeScript services (auth, tickets, orders, payments) with Docker, Kubernetes manifests, NATS, MongoDB, and local CI gates.
- Practiced incident-style debugging: failed deploys, service wiring, and test gates (Jest) before merge.

EDUCATION

B.Tech, Computer Science and Engineering (AI specialization)

ITM SLS Baroda University, Vadodara

2020 – 2024
