

Atul Banyal

Software Engineer

Mohali, Punjab, India | +91 63518 06327 | atulbanyalreal@gmail.com

PROFESSIONAL SUMMARY

Software Engineer with 2+ years of experience and a B.Tech specialization in Artificial Intelligence, specializing in backend development with Ruby on Rails and Python (FastAPI). Delivers production REST APIs for fintech/cryptocurrency and tree care products. Also builds OLTP-to-OLAP data pipelines, replicating MySQL into Snowflake via log-based CDC to serve analytics and BI workloads off the production path. Uses Cursor and AI-assisted development to ship faster, with Docker, Kubernetes, CI/CD, and AWS supporting 1,000+ daily active users.

TECHNICAL SKILLS

Languages: Ruby, Python, JavaScript, Shell Script

Backend: Ruby on Rails, FastAPI, RESTful APIs, microservices, Sidekiq

AI & Development: Cursor, AI-assisted coding workflows, Artificial Intelligence (academic specialization)

Blockchain & APIs: Ethereum, Bitcoin, Solana, TRON, Web3 APIs; Binance, Kraken, CoinMarketCap

Data & Analytics: Snowflake (OLAP), Airbyte (log-based CDC), dbt, ETL/ELT pipelines, OLTP/OLAP architecture

DevOps & Databases: Docker, Kubernetes, GitHub Actions (CI/CD), Git, AWS; MySQL, PostgreSQL, Redis, Snowflake

Tools: Openware Stack (Peatio, Barong, Finex), Postman, Apidog

PROFESSIONAL EXPERIENCE

Software Developer

June 2024 – August 2026

Skyach Software Solutions Pvt. Ltd. | Mohali, India

- Developed and maintained production Ruby on Rails applications serving 1,000+ daily active users on a live cryptocurrency exchange.
- Built Rails REST APIs and wallet/trading modules with PostgreSQL; integrated Ethereum and Bitcoin for deposits, withdrawals, and on-chain processing.
- Connected Binance and Kraken APIs for market data and liquidity; shipped GitHub Actions CI/CD with Docker images to Kubernetes.
- Designed and built Python FastAPI backend services for a tree care platform used by companies that buy, sell, and cut trees, covering listings, orders, and service operations.
- Implemented FastAPI REST endpoints with MySQL models and request/response validation for multi-company product and service workflows.
- Defined API contracts and backend business logic exposing FastAPI services to client applications for end-to-end tree care operations.

KEY PROJECTS

Crypto Exchange Platform

Ruby on Rails, Openware Stack, Docker, Kubernetes

- Built a multi-blockchain cryptocurrency exchange on Openware Stack supporting 1,000+ daily active users with secure onboarding and accounts.
- Engineered real-time order matching and trading flows, and integrated 2+ external exchange APIs for liquidity across trading pairs.

Tree Care Platform — Analytics Pipeline

Personal project

Python, FastAPI, MySQL, Airbyte CDC, Snowflake, dbt, Docker

- Architected FastAPI backend services for multi-company tree buy/sell/cut workflows, modeling MySQL schemas for listings, orders, service appointments, and invoices with typed request/response validation.
- Separated transactional and analytical workloads across two stores: FastAPI writes served from MySQL (OLTP) in milliseconds, replicated into Snowflake (OLAP) for BI dashboards and multi-year aggregates.
- Configured MySQL binlog replication (ROW format, GTIDs) and Airbyte log-based CDC to stream inserts, updates, and deletes into Snowflake without adding query load to the operational database.
- Modeled staging and mart layers in dbt, serving pre-aggregated results to API endpoints instead of scanning five years of orders per request; kept warehouse reads off the hot path with caching and a thread-pooled connector.

EDUCATION

Bachelor of Technology in Computer Science and Engineering, Specialization in Artificial Intelligence

ITM SLS Baroda University | Vadodara, Gujarat | CGPA: 7.7 | 2020 – 2024
